They truly are doing amazing things for their students and have added extra resources for the students including career fairs, health and wellness, clothing and shoes, financial aid, job support and school supplies. Their enrollment and staff members have seen lots of growth since they last spoke to us a couple of years ago. They have a new program called Open Doors which works with students disengaged from school. These students can be there until they are 21. The school also has activities including basketball, frisbee golf and robotics. Volunteers can apply for volunteer opportunities. Members brought lots of socks for them to take back to the students. Lots of food items were given for the Puyallup Food Bank. Thanks everyone for bringing these much needed items and Brian Deren for taking the items to the Food Bank.
